Basic Detail Report

Bottle

Date 200 BCE-200 CE

Primary Maker Vicús

Medium pottery and paint

Description

Until the 1960s, little was known about the Vicus culture, which was located in the far north of Peru. Treasure hunters located several sites where the negative resist designs indentified the ceramics as being from a culture similar to, but different from, the better known Moche of the region. Vicus ceramics are stylistically similar to those produced during the earliest phases of Moche/Gallinazo development. The Vicus adopted a method of oxygen reduction or negative resist to apply designs, such as

those on this double chamber whistling bottle in the form of a seated male figure.

Dimensions

Overall: 7 x 3 5/8 x 5 1/2 in. (17.8 x 9.2 x 14 cm)
